

EXPERIENCE WHERE IT MATTERS

## A CONSUMER FOCUSED LAW FIRM

We focus our practice on vindicating individual clients who have been wronged by the negligence of corporations or their employees.

## WHY US?

Corporations are adept at using the legal system to their advantage, burying unrepresented clients and lesser attorneys in motions, paperwork, and expensive proceedings in an attempt to engage in litigation by attrition – minimizing recoveries by attacking a Plaintiff's pocketbook and his will to pursue his claim. This is not how the founders envisioned our court system.

At CalderonBarton, we've seen these Corporate games, and we know how to beat them. CalderonBarton's experienced attorneys are focused on re-leveling the playing field by calling out corporate misconduct and providing superior representation to clients who might otherwise be unable to fend off these withering corporate attacks. Our team of experts will work with your unique case blaze path through the legal games and find the most efficient and cost-effective path to a just resolution.

Many corporations also seek to avoid responsibility for their actions by forcing meritorious claims into unfair arbitration proceedings, where a Plaintiff's claim must be brought by corporate-paid arbitrators instead of juries, and a plaintiff's ability to procure evidence supporting his claims is severely limited.
